Chairman's Message

Ravelston Architectural Engineering Design consultants prides itself in providing sustainable projects with emphasis on safety, excellence and commitment. We offer various services with utmost focus on our client's needs, considering aesthetics but never compromising on ethical standards, safety and quality.

About Ravelston

We are an established architectural Engineering Design consultant opened in Edinburgh, UK and are also operating in the Middle East region, with a strong track record of providing creative solutions for the most challenging projects. With creative minds we have designed and were supervising a wide range of domestic and commercial projects such as: Hotels, towers, embassies, surgeries and clinics, palaces, villas, Residential, apartments, companies, administrative developments and governmental buildings.

Vision

Being the pioneer in the field of engineering services and becoming the consultant of choice. Through our professional expertise in architecture, engineering and interior design.

Mission

We aim to provide the highest quality service of strategic consulting to our clients by combining highly-skilled team members through professional, excellent designs in our building.

TeamWork

We have gathered the talents of our designers, architectural engineers and architects from all the world. This has added

Our purpose reflects the principles and qualities valued by people inside and outside our organization and guides the way we do

Ravelston Services

We are one of the largest providers of engineering and technical services to the UK defense market, we work in partnership with you to provide independent and objective advice and support across all stages across all stages of a project lifecycle.
